- 1 - Certified 304 stainless steel yoke
- 2 - Durable, smooth riding polypropylene wheel
- 3 - Stainless steel precision bearing

The P&H Series 20 products include casters and wheels that are designed to withstand the environmental challenges typically found in biomedical, and life science laboratory facilities.

Special features include our 304 stainless steel yokes. This premium grade of steel does not develop metal degradation and pitting when exposed to harsh chemicals, wet environments and high temperature applications that can occur with other types of steel.

FEATURES

With their capacity for withstanding high temperatures, these wheels are perfect for oven racks, autoclave and retort carts. Polypropylene.

- High Temperature Use
- Stainless Steel Bearing
- Perfect for Wash Down Applications

OPTIONS

Dia.	Width	Capacity	Hub Length	Bore	Bearing	Weight
W02053AKU0						
3 1/2"	1 3/8"	340	1 1/2"	1/2"	1/2"	.25 LBS
W02033AKU0						
5"	1 1/2"	540	1 5/8"	1 3/16"	3/4"	1 LB.

CASTER

Attachment: 2 3/8 x 3 5/8" Plate
 Plate Hole Centers: 2 15/16" X 1 3/4"
 Overall Height: 6"
 Wheel Material : Polyurethane
 Wheel Diameter: 3 1/2" / 5"
 Load Capacity: 340 / 540 LBS
 Wheel Bearing: 3/8" Dual Precision
 Operating Temp: -20°F TO 290°F
 Weight: 2.1 LBS

APPLICATIONS

- Retort Carts
- Laboratory
- Autoclave
- Oven racks
- Industrial
- Washdown
